

## Features

- · Constant Current mode output
- Wide input range 90~305VAC (Class I)
- Built-in active PFC function
- · Class 2 power unit
- No load power consumption < 0.5W</li>
- IP67 rating for indoor or outdoor installations
- 3 in 1 dimming function (Isolation design)
- Life time>50,000 hours and 5 years warranty

# Applications

- · Street lighting
- · Architectural lighting
- · Low bay lighting
- · Floodlight lighting
- Industrial Lighting
- Type "HL" for use in Class I, Division 2 hazardous (Classified) location.

# Description

XLG-20 series is a AC/DC LED driver featuring the constant current mode output. XLG-20 operates from 90~305VAC. Thanks to the high efficiency up to 89%, The entire series is able to operate between -40 °C ~+80 °C wide case temperature range with air convection. The design of metal housing and IP67 ingress protection level allows this series to fit both indoor and outdoor applications. XLG-20 is equipped with various function options, such as dimming methodologies, so as to provide the optimal design flexibility for LED lighting system.XLG-20 series comply with the latest version of IEC61347/GB7000.1 -2015 and UL8750 international safety regulations. The output and dimming circuit are also completely in accordance with the new regulations with isolation to ensure the safety of both user and luminaire system during installation.

De-rating may be needed under low input voltages. Please refer to "STATIC CHARACTERISTIC" sections for details.							
4. The driver is considered as a component that will be operated in combination with final equipment. Since EMC performance will be affected by the							
complete installation, the final equipment manufacturers must re-qualify EMC Directive on the complete installation again.							
5. This series meets the typical life expectancy of >50,000 hours of operation when Tcase, particularly (to point (or TMP, per DLC), is about 80°C or less.							
6. Please refer to the warranty statement on MEAN WELL's website at http://www.meanwell.com							
7. The ambient temperature derating of 3.5°C/1000m with fanless models and of 5°C/1000m with fan models for operating altitude higher than 2000m(6500ft).							
10. Ripple & noise are measured at 20MHz of bandwidth by using a 12" twisted pair-wire terminated with a 0.1uf & 47uf parallel capacitor.							
11. To fulfill requirements of the latest ErP regulation for lighting fixture, this LED driver can only be used behind a switch without permanently connected to the mains.							
12. If you need the NOM (Mexico) certificate, Please contact MEAN WELL sales representative for details.							
13. Output current ripple is meansured at 230VAC input, full load and 25°C of ambient temperature.

# ■ TOTAL HARMONIC DISTORTION (THD)

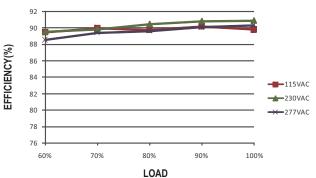

#### ★ L Model, Tcase at 75°C

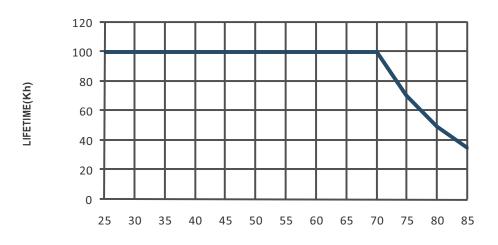

#### ■ EFFICIENCY vs LOAD

 $\,$  XLG-20 series possess superior working efficiency that up to 89% can be reached in field applications.

★ L Model, Tcase at 75°C

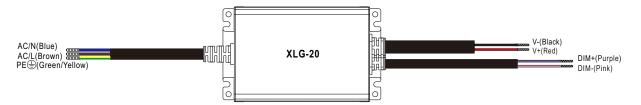

# ■ LIFE TIME

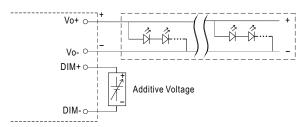

#### **■ DIMMING OPERATION**

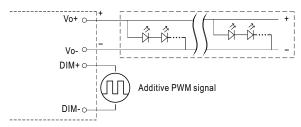

#### $\divideontimes$ 3 in 1 dimming function (for B-Type)

- Output constant current level can be adjusted by applying one of the three methodologies between DIM+ and DIM-:
   1 ~ 10VDC, or 10V PWM signal or resistance.
- Direct connecting to LEDs is suggested. It is not suitable to be used with additional drivers.
- Dimming source current from power supply: 103µA (typ.)

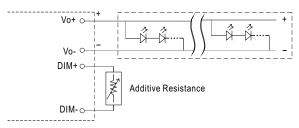

"DO NOT connect "DIM- to Vo-"

O Applying additive 10V PWM signal (frequency range 100Hz ~ 3KHz):

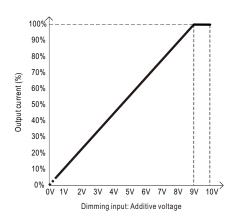

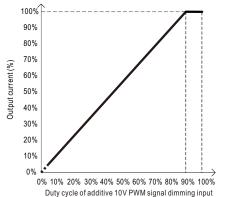

"DO NOT connect "DIM- to Vo-"

Applying additive resistance:
